GSTF EXPANDS ONLINE CERTIFICATION COURSES

Today **Global Science & Technology Forum (GSTF)** launched an online “**Certification in Cloud Computing (CCC)**” course as a new initiative to offer interactive e-learning contents for corporate and industrial world from a team of in-house professionals and experts on cloud computing.

Certification in Cloud Computing (CCC) will impart the participants the ability to understand the principles and foundations of cloud computing, various types of clouds, and current cloud offerings that they can make use; the skills to identify potential benefits and risks of cloud computing, and the ability to evaluate cloud’s basic offerings. The program will provide participants essential skills to understand the concepts of cloud computing as well the technologies and framework that support cloud computing, the ability to apply cloud computing, and the ability examine and recommend suitability of, as well as implications of, cloud computing for a given application considering several technical and non-technical aspects.

GSTF offers instructor lead courses in Singapore and through GSTF partners in the region in Cloud Computing, Business Analytics, Big Data, Data Quality & Governance, and Green IT and certification programs in Certified Cloud Computing Associate, Certified Cloud Computing Specialist, Certified Cloud Computing Professional, Certified Business Analytics Specialist, Certified Information Quality Associate, Certified Information Quality Professional, Certified Information Governance Professional, Certified Green IT Associate, Certified Green IT Specialist, Certified Green IT Professional. GSTF will be launching additional on line courses and certification programs in the coming months.

Forthcoming GSTF E-learning courses are

- GreenIT
- Big-Data
- Data Scientist

About GSTF

Since 2008, GSTF has dedicated to promoting research and development and offers an inter-disciplinary intellectual platform for top notch scientists, researchers, academics and industry professionals in Asia Pacific to actively consult, network and collaborate with their counterparts across the globe. GSTF has been administering nearly 40 international conferences on an annual basis, publishes 31 international journals (mostly quarterly), training and certification programs in Information Technology (IT), publishes books, maintains an on line library (GSTF Digital Library) amongst other academic activities. There are nearly 1000 academics from leading Universities (including NUS, University of California-Berkeley, UCLA, Carnegie Mellon University, Oxford University, Cambridge University, Purdue University) involved in the various committees (program committee/editorial board) of GSTF. GSTF partners with 34 universities and another 63 universities partner with GSTF on various conferences.
