ICT Training Excellence

An accredited training and certifications provider, RAPIDSTART, is the Authorized Training Provider (ATP) of Global Science and Technology Forum (GSTF) in Singapore in the areas of Business Analytics, Cloud Computing, Internet of Things, Machine Learning and AI. We profile the firm to learn more about its leading and cutting edge technology offerings and how it works to provide every client with the very highest standards of service and support they can rely on.

Founded in 2000 by Dr. Anton Ravindran, RAPIDSTART designs, implements and provides training & certification in the areas of Big Data, IOT and AI amongst others. Few organisations have all of the internal skills to build a completely integrated information solution and this is where “state of the art” expertise available from RAPIDSTART can assist businesses and ICT professionals. Throughout the consultation, assessment, implementation and training process RAPIDSTART works to create optimum business solutions for their clients’ businesses. It is an Authorised Training Partner of Global Science & Technology Forum (GSTF). The programs, courseware and certifications are developed by GSTF and delivered by RAPIDSTART in Singapore and through authorised partners outside of Singapore. Its founder, Dr Anton has nearly 3 decades of experience in the ICT industry and brings value through his experience with major MNCs including IBM, Sun Microsystems, CA, Oracle. As a technopreneur, he has been responsible for 5 ventures all which continue to be successful operating entities. He has won several accolades for his outstanding contributions as entrepreneur and has and continues to be involved with several professional bodies. He has also been adjunct and visiting professor in the UK and Dubai and remains visiting/adjunct professor in Germany and Indonesia.

GSTF is a pioneer in developing the training and certification programs on Big Data, Data Science, IOT, Machine Learning/ AI and Blockchain based on Open Source Technologies. The programs are offered in several countries through its authorised partner networks in Singapore, Malaysia, Philippines, India, Vietnam, Oman, Jordan and in the US. They are expanding their network of partners and expected to enlist more partners in 2018.

RAPIDSTART training and certification programs empower infocomm professionals with the expertise in building world-class IT solutions, providing the participants with in-depth knowledge, skills and expertise needed to understand, evaluate, develop and deploy computing solutions in a wide range of content. The firm’s courses are mapped to National Infocomm Competency Framework (NICF) standards and endorsed by Infocomm Media Development Authority (IMDA) of Singapore, thereby allowing both infocomm and non-infocomm professionals to build capabilities, deepen their infocomm skills and upgrade themselves in the dynamic, competitive and fast changing infocomm industry.

In Singapore, RAPIDSTART has also secured CITREP endorsement by IMDA for Cloud Computing, Big Data, Business Analytics, IOT and Data Science that provides up to 90% funding by this Singapore governmental organisation for the net fees payable for such course and certification/assessment fees, thereby allowing both infocomm and non-infocomm professionals to build capabilities, deepen their infocomm skills and upgrade themselves in the dynamic, competitive and fast changing infocomm industry in keeping with the government’s emphasis on life-long learning and promoting skills for the future.

Fundamentally, with emphasis on quality and expertise, RapidSTART ensures that its products and services completely meets its clients’ requirements at all times, thus achieving a high level of customer satisfaction and commitment in the implementation of leading edge solutions based on Cloud computing, Big Data, IOT and AI technologies. Looking ahead, this will remain its ongoing focus as it seeks to continue offering its clients the level of expertise and service that they have come to rely on.
